eaSyFix

Extremity Immobilization System

AnatGe

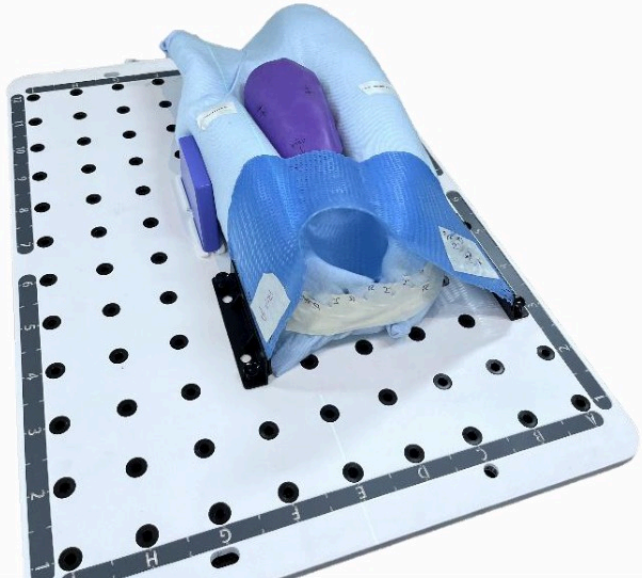

eaSyFix is a platform designed for precise extremity immobilization.

AnatGe

Features

- Includes **five indexing markers** for immobilization cushions.
- **Compatible with a range of masks** designed for extremities.
- Made from **artifact-free, low-attenuation materials.**
- MRI compatible (**MR Conditional at 3 T**).

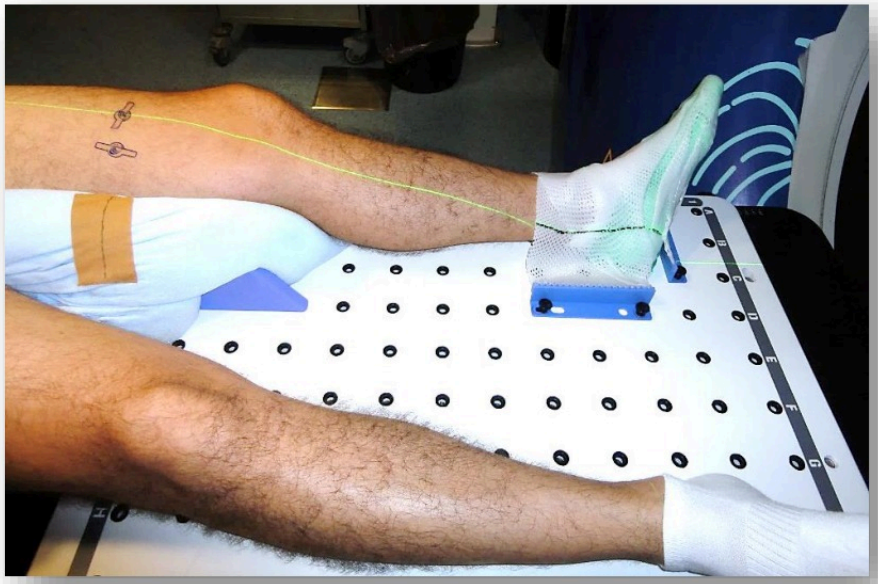

AnatGe

Lower Extremity

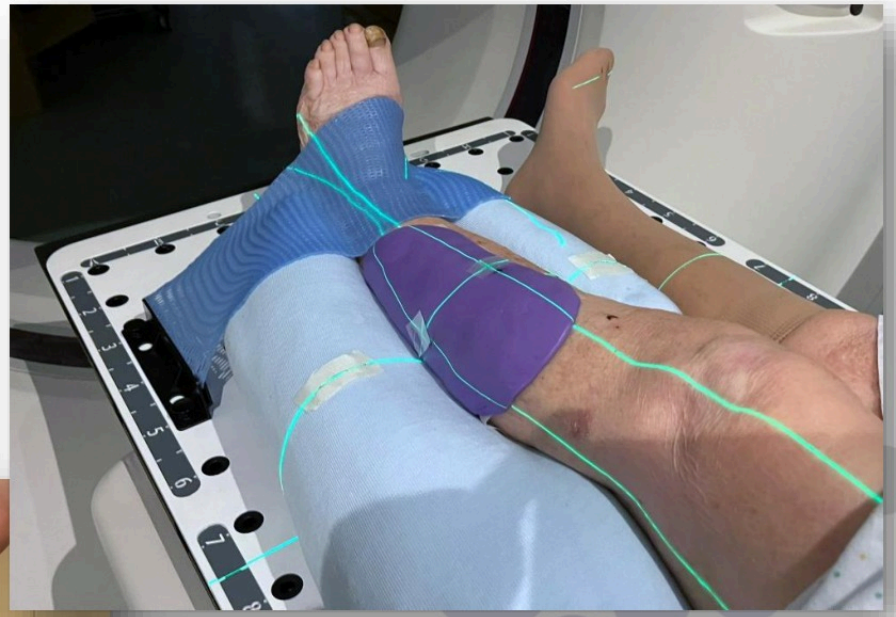

Immobilization

AnatGe

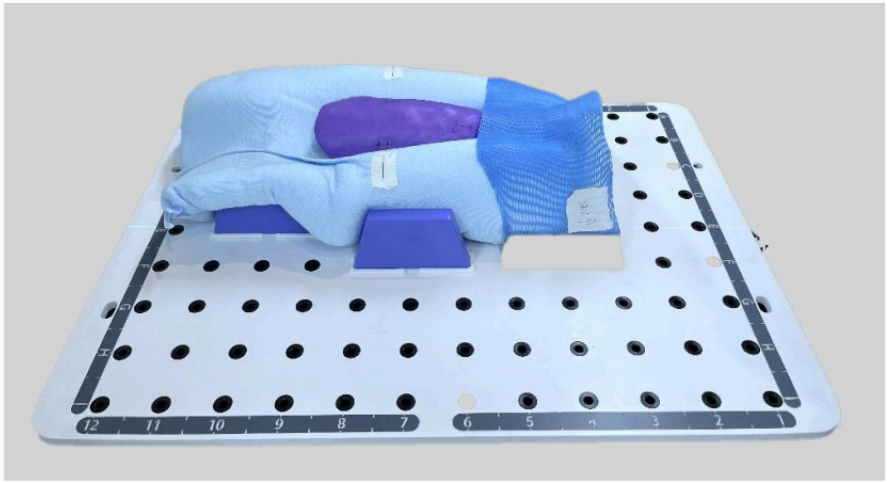

Multiple indexing locations for thermoplastic masks and cushion markers let clinicians tailor the setup to the anatomical site.

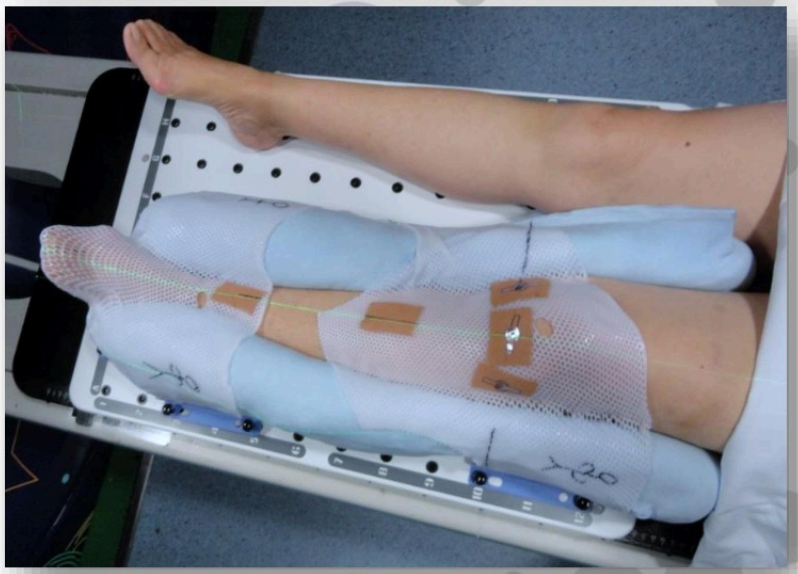

AnatGe

Cushion indexing markers enable precise, reproducible cushion placement on eaSyFix.

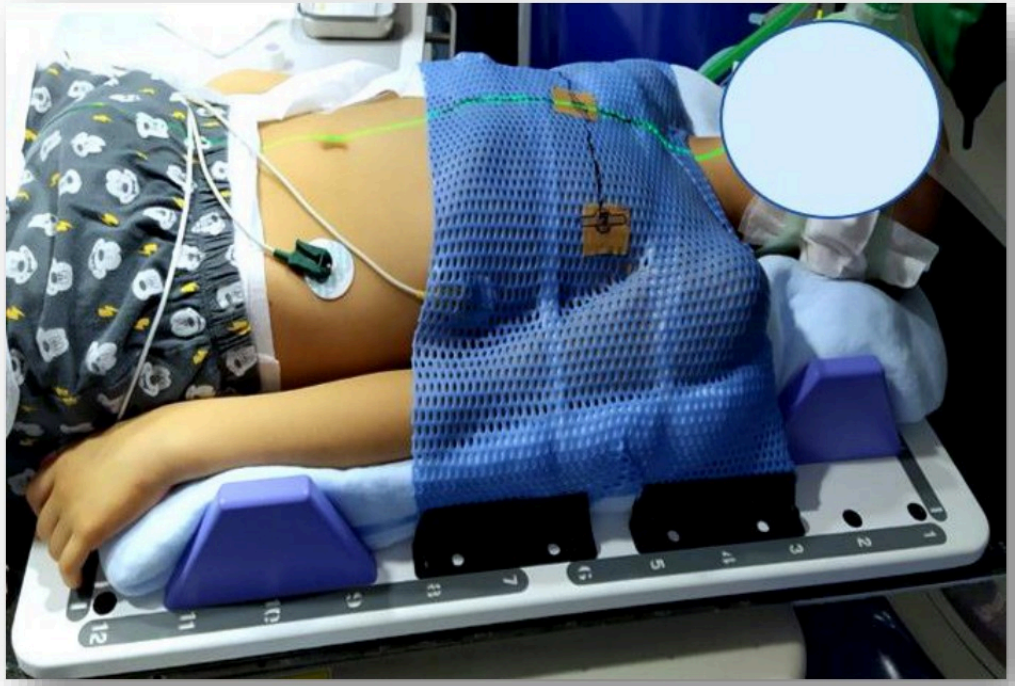

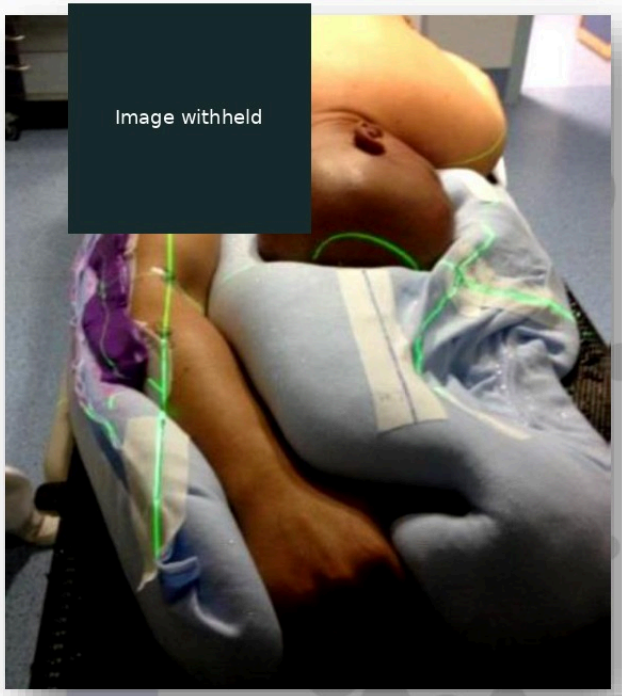

AnatGe

Upper Extremity Immobilization

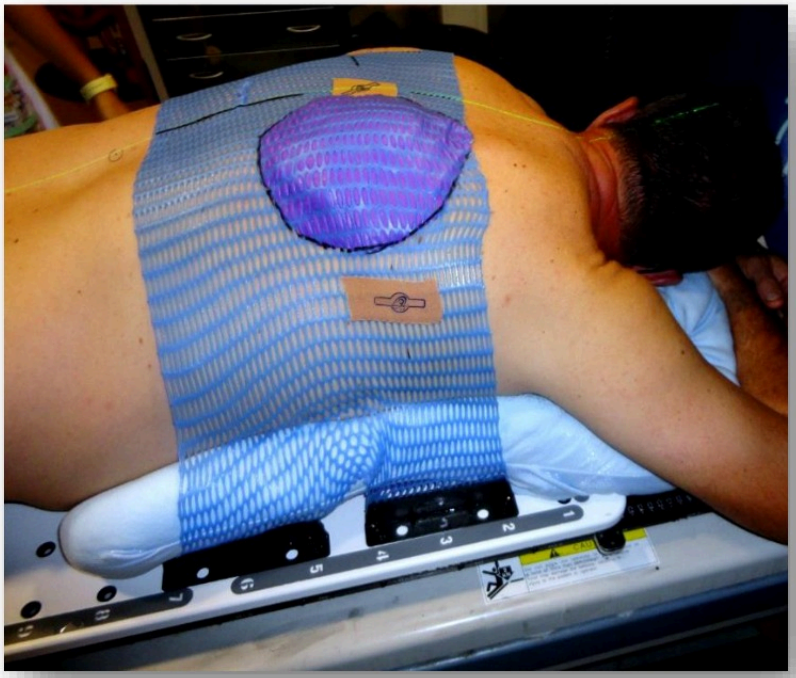

AnatGe

Prone Immobilization

The system adapts to a range of anatomical sites and supports **treatment in the prone position.**

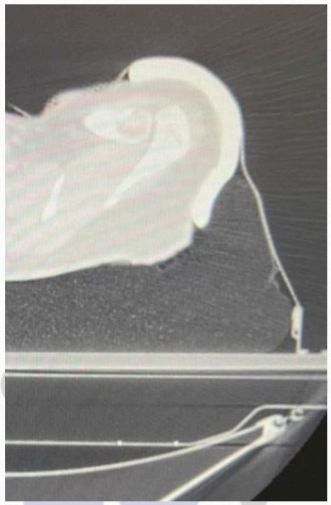

AnatGe

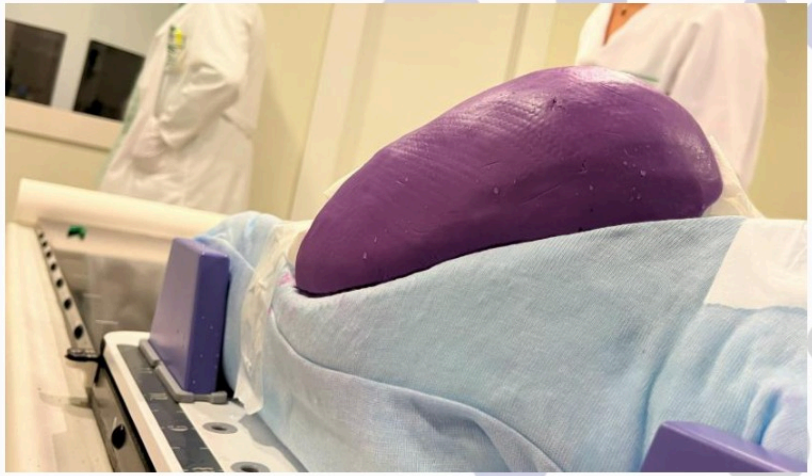

Supine Immobilization
